

Downloading GCSEPod to Android Devices

- 1) Choose the title you wish to download and click: 
- 2) A box will open. Click 'Save' and save the file onto your computer, making sure you can remember where to find it!

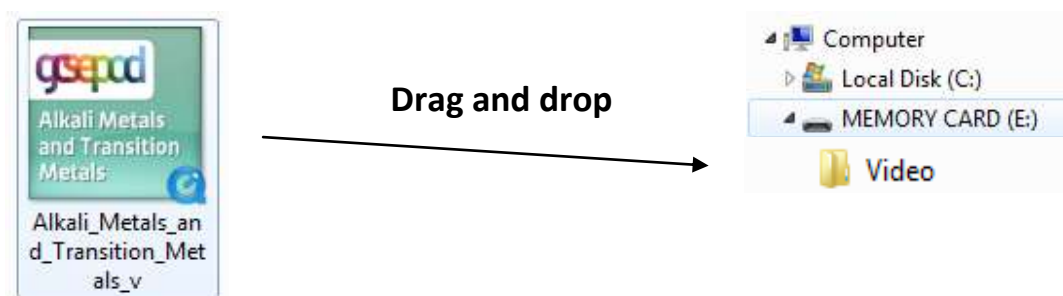

- 3) Connect your Android device to your computer using the USB cable
- 4) Your Android device should prompt you to choose which type of connection you wish to make. Choose the 'Mounted' connection type.
- 5) The following dialog box should pop up asking what you want to do with the new hardware. Click 'Open folder to view files.'

(If the dialog box does not pop up, go to the Start Menu, My Computer, double click on "Removable Disk" and you should see your Android's memory card there.)

- 6) Drag and drop the GCSEPod file from its saved location into 'Video'

- 7) Disconnect your device from your computer

You will now find the GCSEPod podcast in 'Videos' on your Android device.

Note: If you have the doubleTwist application installed on your computer you can transfer the GCSEPod files to your Android by using the doubleTwist media library.
